

Xtreme conditions demand XtremeCare

PROTECT your skin in the harshest environments

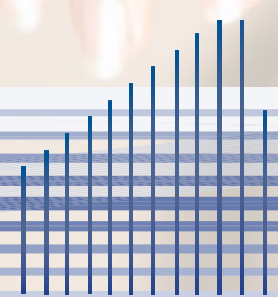

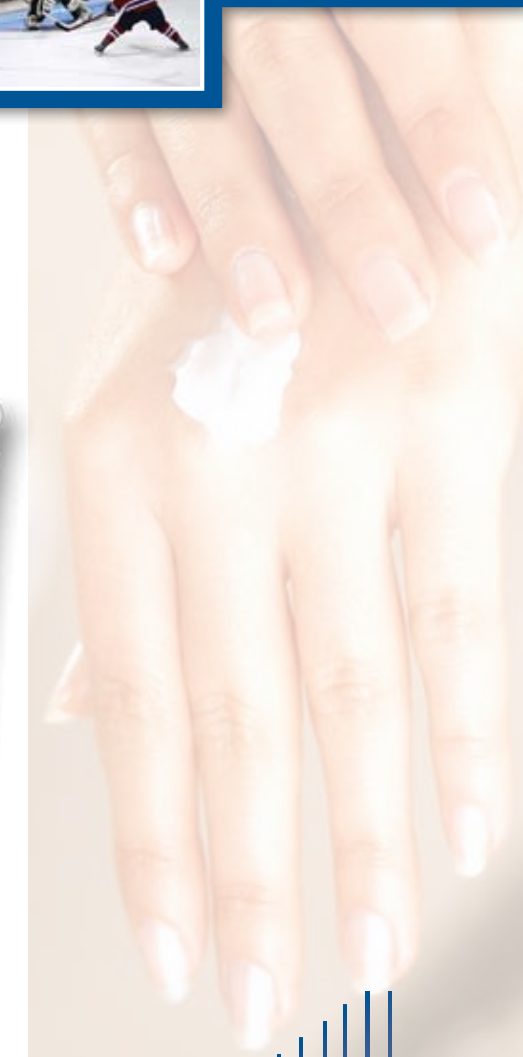

Cold, dry air, chemicals, dirt and dust are natural enemies of optimum skin health. Exposure to these elements – especially low temperature and lack of humidity – can cause your skin’s natural defense systems to shut down, resulting in dryness, cracking and pain.

STOKO XtremeCare™ adds essential lipids back to your skin, keeping it hydrated, healthy and pain-free. Wherever your skin is exposed to harsh, cold environments – outdoors or in – you need the powerful skin defense advantage of STOKO XtremeCare™.

Specially formulated for easy application and maximum protective power at low temperatures. Silicone-free STOKO XtremeCare is rapidly absorbed to bring quick relief and provide strong, long-lasting defense against the skin’s natural enemies. XtremeCare’s powerful formula also restores severely dry skin – anytime, anywhere.

*Passed Lineman’s Glove Testing
(Type 1 Class 2 ANSI / ASTM D120)*

Note: This product will not prevent heat loss at a significant level and should not be used in place of protective clothing and equipment.

Xtreme conditions demand XtremeCare

The product will not freeze

- Dispenses easily at low temperatures
- Advanced formula does not thicken even at the lower temps
- Keep it with you to apply as and when you need it most
